Pointer lift, 4 posts 4 ton

Pointer lift, 4 posts 4 ton

Features:

1. Both column and beam are bent by one-piece steel, stronger.
 2. New beam structure is more beautiful, daily maintenance or parts changing easier.
 3. Ramp with punching design, more slip resistant performance.
 4. With more security protections, with anti-broken lock for steel ropes, passed a test of up down continuous movement 1000 times.
 5. All oil hoses are hidden and protected under platform. Manual and electric control system can be optional.
 6. Standard with one jacking beam, low noise, lifting fast, very convenient.
- This lift design is suitable for alignment service , and car repairing.
